

Fujifilm Instax Instructions

Setup time: 2 minutes

Instructions:

1. Load provided film into the Fujifilm Instax by pushing on the spring/button on the back of the camera, which will open the film door.
 - a. Make sure not to store film in excessively sunny or humid areas.
2. When the film door is open, there will be a small yellow stripe on the top right of the camera. There will also be a small yellow stripe on the film pack. Match up these yellow stripes and close the film door. The circular window located just outside the door should read "S".
3. Turn the camera on by pushing the button located near the bottom of the lens. This will pop out the lens and prepare the camera to take photos.
4. To take a photo, press the circular button located on the front of the camera.
 - a. A piece of black plastic may pop out first. This is used to protect the film from exposure before it's used.
